- Implemented responsive and user-friendly frontend solutions for optimal user experience.
- Drove the development of Elonatech's website. Additionally, took on UI/UX responsibilities, enhancing user experience with personally curated designs for each page.

PERSONAL PROJECTS

Full Stack E-Commerce Website

Project Overview: Led the end-to-end development of a dynamic and user-friendly E-commerce platform, incorporating advanced features to enhance the shop ping experience and streamline business operations.

Key Responsibilities:

- **User Interface Design**: Crafted and intuitive and aesthetically pleasing front-end using modern web technology such as HTML5, CSS3, and JavaScript frameworks like Reacts. Js.
- **Server-side Logic:** Developed robust server-side logic using Node.js, ensuring efficient handling of business logic, data processing, and server management.
- **Database Architecture:** Designed and implemented a scalable and secure database structure using MongoDB to store and manage product, user, and transaction data.
- **Security Implementation:** Ensured application security through best practices in authentication and authorization, employing JWT for secure user session and data protection.
- **E-commerce Functionality**: Implemented key E-commerce features including product catalog management, shopping cart functionality, order processing and payment integration using Stripe.
- **Responsive Design:** Ensured a seamless experience across devices with responsive design techniques and mobile first development strategies.
- **Third-Party Integrations**: Integrated various third-party services and APIs for enhanced functionality; such as real-time shipping rates, social media logins, and analytics.
- **Deployment:** Deployed the application on Vercel

Full Stack Developer – Food Delivery Web Application

Project: Developed a full stack food delivery web application.
Technologies: HTML, CSS, JavaScript React, Node.js, Express, MongoDB.
Key Responsibilities:

- Designed and implemented a responsive front-end using React Built and integrated RESTFUL APIs with Node.js and Express for seamless data flow.
- Utilized MongoDB for efficient data storage and retrieval.
- Developed user authentication and authorization features.
- Implemented a real time order tracking system.
- Ensured mobile responsiveness and cross-browser compatibility.

Achievements:

- Successfully reduced page load times by 20%.

- Increased user engagement by 30% trough intuitive Ul/UX design

Dynamic Student Registration Application

Project Overview: Developed a dynamic student registration application using HTML, CSS, and JavaScript to facilitate the registration of students for events. The application tailored the registration form based on whether the student is an undergraduate or postgraduate, ensuring a streamlined and user-specific experience.

Project Highlights:

- Successfully implemented a dynamic registration form that adapts based on user input, improving the registration process for both undergraduate and postgraduate students.
- Enhanced user experience by providing a tailored and intuitive interface.
- Ensured data integrity and completeness through robust form validation.
- Achieved a seamless and responsive design that work well on both desktop and mobile devices.

Restaurant Web App

- Developed a Restaurant website that enables customers know more about the restaurant and also the owner of the restaurant
- Which also enable customer access the menu list and also order meals
- I implemented the web app using html, css and React Js for the frontend
